

Eli Lilly and Company is a Global Pharmaceutical Company Leader in the Discovery, Development and Marketing of Innovative Drugs, with an annual R&D expenditure of more than 2 billion dollars.

To support the drug discovery process, the company is seeking candidates to join the Lead Optimization Biology (LOB) Laboratory, at the Alcobendas Research and Development Center.

Chromatographer/ Mass Spectrometry

We are looking for a candidate with a broad knowledge of liquid chromatography and mass spectrometry as it applies to the needs of in vitro biology and drug discovery. The qualified candidate will be responsible for establishing and performing a variety of LC/MS based methods to interrogate enzymatic drug targets in a medium and high throughput manner. Some experience of metabolomics and tQQQ and/or TOF mass spectrometers would be an advantage.

The profile

- A degree, B.Sc., Ph.D. or equivalent experience in Analytical Chemistry
- A demonstrated understanding of Liquid Chromatography Mass Spectrometry
- Ability to work independently and ability to interact with a multidisciplinary team of biologist, medicinal chemists and pharmacologists
- Strong written and verbal communication skills, excellent problem solving abilities and proved record of scientific excellence through publications in peer-review journals.
- Excellent English level is mandatory.

We offer

Integration in a highly qualified and motivated team. Continuous personal and career development. Competitive salary is commensurate with experience and qualifications. Exceptional benefits are included.
