

MASS SPECTROMETRY TECHNICIAN POSITION AT THE INSTITUT CATALÀ D'INVESTIGACIÓ QUÍMICA

A position as technician is available at the Mass Spectrometry Unit of the Institute of Chemical Research of Catalonia (ICIQ). The Mass Spectrometry Unit is equipped with three state of the art high resolution mass spectrometers to support the research undertaken by the different groups at the ICIQ. The selected candidate will develop the following tasks:

- Operation, maintenance and calibration of mass spectrometers and HPLC chromatographs.
- Give technical support to the researchers.
- Help new researchers in the use of the techniques and equipment of the Unit.

Requirements for the candidate:

- A degree in chemistry or chemical engineering.
- Conscientious, detail oriented and well organized person.
- Good interpersonal and communication skills.

The following will be positively evaluated:

- Previous experience in the use of mass spectrometers, HPLC and/or GC.
- Good knowledge of English.

We offer:

- A creative and professionally stimulating scientific environment.
- Competitive conditions in accordance with the applicant values.
- Immediate incorporation.

Location:

Institut Català d'Investigació Química
Av. Països Catalans, 16. 43007 Tarragona (Spain)

The applicants should submit a CV and a cover letter with a description of previous accomplishments in relation to this application and indicating the position reference (Ref.:MS-Tech) to POSITIONS@ICIQ.ES or ordinary mailing address.
