

PhD Studentship: 'Designing molecular rotors to image intracellular viscosity'

Applications are invited from students with an appropriate background in chemistry, with an interest in spectroscopy, photochemistry and biological imaging. In addition the interest in synthesis of fluorescent probes is desirable. This position has a flexible start date and will be available from 1st October 2010. To apply for this project please send a C.V. and details of at least two referees to:

Dr Marina Kuimova

Department of Chemistry, Imperial College London

Exhibition Road, South Kensington

SW7 2AZ London (UK)
